DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 18-22, and 31-32, drawn to an invention directed to electronic shopping using a shopping basket, classified in class 705, subclass 26.
 - II. Claims 8-17, and 23-30, drawn to an invention directed to a search engine classified in class 707, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

1.1 Inventions of groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility of electronic shopping using a shopping basket to drag and drop items from a plurality of sources from the invention of Group II which is directed to a search engine for conducting searches for a list of items, identifying them and matching them to the listed items. The Group See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3625

3. Because these inventions are distinct for the reasons given above and the search required for Group I, i.e. drag and drop capabilities are not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. A telephone call was made to attorney Mr. Himanshu S. Amin on September 09, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
